

YOUR PARTNER FOR INNOVATIVE MEDICAL TECHNOLOGY

ABOUT US

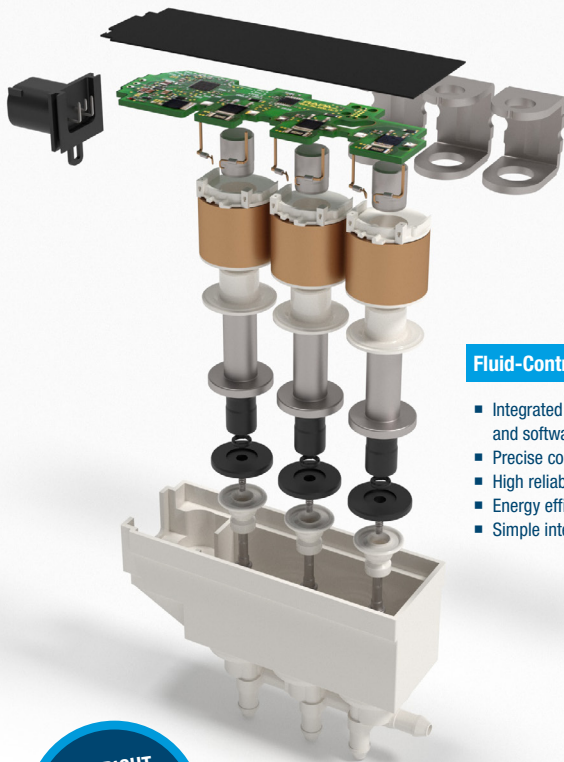

RAPA Healthcare is the medical technology division of the established RAPA Group based in Selb, Bavaria. As part of a globally recognized engineering and technology partner, we leverage synergies to deliver tailored solutions that meet your specific needs.

As a trusted MedTec supplier, we support German, European and global manufacturers and distributors in the development and production of individual components, assemblies and integrated system solutions for medical and analytical devices. Our technologies are characterized by efficiency and user-friendliness.

We produce all products in our own facilities using our processes, ensuring consistent quality and precision at every stage. With decades of expertise in valve and fluid technology, electrical engineering, and mechatronics, we turn innovative ideas into high-quality, production-ready solutions.

VALVE SOLUTIONS & FLUIDIC COMPONENTS

FROM ENGINEERING TO SERIES PRODUCTION

Fluid-Control-Unit

- Integrated electronics and software
- Precise control
- High reliability
- Energy efficiency
- Simple integration

THE RIGHT
SOLUTION
FOR MEDICAL
DEVICES

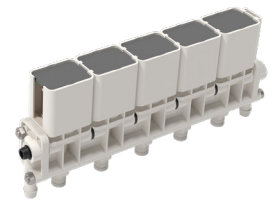

PRODUCT AND SERVICE PORTFOLIO

Our portfolio includes valves and valve systems, fluid management components, microfluidic solutions as well as integrated electronics and software. These not only fulfill the constantly growing requirements for medical technology components, but also exceed hidden needs.

Our solutions fit seamlessly into your systems and offer maximum efficiency and reliability. Trust in our expertise and let us develop innovative solutions for your challenges together.

Modular Valve Assemblies

- Flexible and cost-efficient
- Various applications

Media Separated Valves

- Dispense media free of contaminants
- High chemical resistance
- Flexible and cost-efficient solutions

Piezoelectric Micro Pumps

- Compact and lightweight
- Chemically resistant
- Energy efficient
- Precise microfluid delivery
- Stainless steel media contact

Multi-Valve Assemblies

- Sensors and ECU integrated
- Optimized control and monitoring
- High precision and performance

Hydraulic Valves

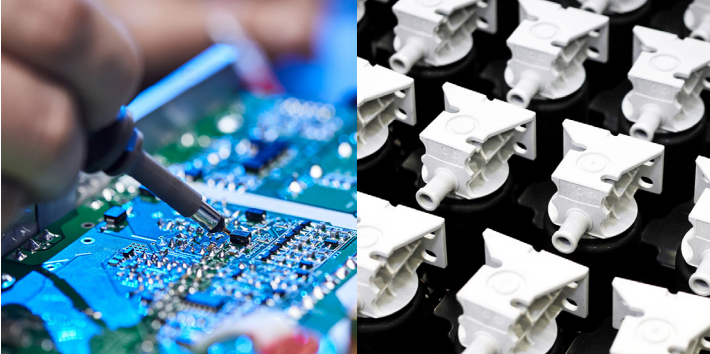

- Precise control
- High reliability
- Versatile applications

Stainless Steel Gas & Fluid Valves

- Corrosion-resistant
- Durable and robust
- Suitable for aggressive media

FROM ENGINEERING TO SERIES PRODUCTION - ALL IN ONE PLACE

From the initial idea to series production, we support you with comprehensive development expertise. Unlike suppliers of standard catalog products, we deliver tailor-made solutions. Our services include consulting, concept development, mechanical, electronic, and software design, prototype construction, and quality management.

Using agile project management, our highly skilled engineers create innovative, functional, and cost-effective solutions for medical and analytical devices. All of our products are manufactured in our plants located in Germany, USA, and China.

**INNOVATE
WITH US!** 

BENEFITS AT A GLANCE

» TIME AND COST SAVINGS

Save time and money by outsourcing your development projects to us, allowing you to focus on your core competencies. Our in-house R&D department provides the necessary know-how and technological expertise.

» QUALITY ASSURANCE

RAPA has an accredited in-house laboratory, extensive simulation and validation facilities. We produce 100% end-of-line tested products at our plants in Germany, USA, and China.

» TRUSTED CERTIFICATIONS

We are ISO 9001, ISO 14001, ISO 13485 and ISO 17025 certified to ensure the highest product standards.

» AFFORDABLE CUSTOMIZATION

Our company combines product and process development and manufacturing under one roof. This close integration allows us to incorporate manufacturing processes and knowledge into the development phases from early on. Combined with advanced automation, efficient production techniques and effective supply chain management, we can offer cost-effective, high-quality customized products.

OUR CORE EXPERTISE

SERIES PRODUCTION

- In-House Production
- Small, Medium & Large Scale
- Industry 4.0 / ISO 9001 / ISO 13485

IN-HOUSE TESTING

- Accredited Laboratories
- Simulation
- Mechatronics
- Service Life
- Acoustics
- Environmental

PRODUCT DEVELOPMENT

- New Components & Systems
- Product Modifications
- Unique & Specialized Solutions

CUSTOM ENGINEERING

- Start with your ideas during your development phase
- Get the product your project deserves

- » VALVE TECHNOLOGY
- » FLUID MANAGEMENT
- » ELECTRONICS & SOFTWARE
- » SYSTEM SOLUTIONS
